

Telenav is seeking a highly motivated UI/UX designer to help define the next generation of connected car software experience, maps and automotive interfaces. As a UI/UX Designer in the Automotive Design team you will work closely with product managers, engineers as well as fellow designers and user researchers to create software that will shape the future of assisted and autonomous driving in connected cars for a rapidly expanding list of the world top automakers.

Successful candidates will have both an excellent design portfolio as well as a background and interest in how technology works.

Telenav is a leading provider of connected car and location-based services, focused on transforming life on the go for people - before, during, and after every drive. Leveraging our location platform, we enable our customers to deliver custom connected car and mobile experiences. To learn more about how Telenav's location platform powers personalized navigation, mapping, big data intelligence, social driving, and location-based advertising, visit [www.telenav.com](http://www.telenav.com).

**Responsibilities:**

- Define narratives of how never-invented-before in-vehicle software will be used
- Create storyboards and wireframes of user interactions
- Collaborate with product managers, engineers and user researchers to produce prototypes and production software that will be used by millions.
- Generate simple concept prototypes to illustrate and evangelize concepts
- Collaborate with other designers and user researchers to enhance the software experience
- Create interaction and interface specifications

**Requirements:**

- 3+ years of UI/UX design or related design experience
- Great collaboration and communications skills
- Demonstrable experience turning product concepts into implementable designs (new product introduction)
- Experience designing for smart phones and tablets
- Experience building basic interaction prototypes to illustrate user experience ideas
- Excellent skills in either Figma, Sketch, Abstract, Adobe Illustrator, Photoshop, Principle, Protopie, Hand sketching.
- A positive attitude, open mind, and a desire to collaborate, learn and have fun
- A healthy desire to break the status quo
- Understanding and interest in foreign culture and languages a plus because we design global products
- Have a professional level English is a plus.

**TN Design team benefits:**

- An opportunity to work in a global product company working on cutting edge products in a rapidly changing industry
- Working with smart, highly skilled teams in a challenging, fast paced environment
- An opportunity to see our products come to life in millions of automobiles around the world
- Opportunity to work with latest technologies and best practices
